- Dimensions: 165mm x 147mm x 35mm

Self-discover Nightfall Mobile App

BALTX2 supplied with the Mini4

Endless Music

Use Airplay to stream your music anywhere you have Wi-Fi in your home or office and an Alexia skill enables Voice Control. An additional 5 Physical inputs, 2 of them provided by a balanced connection (Balen included) so your source can be 300ft away. As the amplifier has such a small profile, it can be installed almost anywhere, you are no longer bound by an AV rack to hold equipment.

The four powered stereo outputs deliver an enviable 30 watts per room, simply add more Mini4's to expand up to 96 rooms. This is a hidden audio system with that can fill your home with music.

Unrivalled Control

The **FREE** app (iOS and Android) auto discovers the Amplifier so there is no complex setup. Further customization can be achieved using the amplifiers internal webpage which provides you to configure the system the way you like it.

Audio Control

Adjustable Bass, Treble, Balance, Loudness and a 7-band parametric EQ with 600mS of adjustable audio delay allow you to fine tune your system to your exacting needs.
And the Mini 4 uses industry standard wiring of speaker wire, network cables, and audio source cables so replacing older non-App based systems is a breeze.

Adding an AX-AMM Media Manager provides internet streaming allowing playback from thousands of internet radio stations from TuneIn Radio, listen to Spotify, Tidal or from your mobile device, even from network attached storage, all controlled by the free auto discovery app (iOS and Android) or keypads that put you in control.

Prepare to be spellbound in as many rooms as you need.
